

School of Chemistry

Research Seminar Programme

Semester 1 (Michaelmas Term) October to December 2014

Thursdays at 12 noon*

Chemistry LARGE Lecture Theatre*

Main Chemistry Building

Date	Speaker	Affiliation	Title
02/10/2014	Prof. Rachel Evans	School of Chemistry, TCD	Soft Organic-Inorganic Hybrid Materials Derived From Conjugated Polymers: <i>From fundamental design to applications in sensing and solar energy conversion</i>
09/10/2014	Prof. Colin D. Bain	Department of Chemistry, Durham University	Light: the World's Most Unlikely Construction Material
16/10/2014	Dr. Mary Pryce	School of Chemical Sciences, DCU	The many uses of metal carbonyl complexes. From medicinal to atmospheric chemistry
23/10/2014	TBC	TBC	TBC
30/10/2014	Prof. Damien Murphy	School of Chemistry, Cardiff University	An Electron Magnetic Resonance Investigation of Paramagnetic Centres in Catalysis
06/11/2014	Study Week – No Seminar		
13/11/2014	Dr. Sebastien Clément	Institut Charles Gerhardt Montpellier (ICGM) Université Montpellier 2	Designing pi-conjugated polymer-based materials for organic electronics
20/11/2014	TBC	TBC	TBC
27/11/2014	Dr. Patrick McGowan	School of Chemistry, University of Leeds	Attaching organometallics to polymers: from supported catalysts to little black dresses
04/12/2014	TBC	TBC	TBC
11/12/2014	Prof. Andrew Beeby	Department of Chemistry, Durham University	TBA

*unless otherwise stated
