

School of Chemistry
Updated Research Seminar Programme
Semester 1 (Michaelmas Term) 2011
Thursdays at 12 noon*
Large Lecture Theatre*

Thursday 27 October	"Designed Nitroxides: Sensors and Use in the Preparation of Designed Materials"	Prof. Rebecca Braslau, University of California-Santa Cruz
Thursday 3 November	Amended "X-Ray Spectroscopic Studies of Mechanically and Chemically Modified Metal-to-Insulator Transitions in Thin Film Vanadium Oxides"	Prof. Kevin E. Smith, University of Boston
Thursday 17 November @ 12 Noon	New "Madame Curie - more than the Scientist"	Prof. Nicole J. Moreau, President of IUPAC
New INAUGURAL COCKER LECTURE *Thursday 17 November * @ 6 p.m. * Tercentenary Hall, Trinity Biosciences Institute, Pearse Street Admission is <i>free of charge</i> , but tickets must be obtained in advance from the School of Chemistry, TCD Contact Ms Jill Galvin 01-8961726, or email: galvinji@tcd.ie		
Thursday 24 November	"Immobilization and Wiring of Redox Enzymes on Carbon Nanotubes"	Dr. Michael Holzinger, Département de Chimie, Moléculaire Université Joseph Fourier
Thursday 1 December	"Fluorine - A Universal Tool for the Design of Liquid Crystals"	Prof. Peer Kirsch, Director Emerging Technologies, Merck, Germany
Thursday 8 December	"Fighting Cancer with Precious Metals"	Dr. Celine Marmion, RCSI-Dublin
Thursday 15 December	"Light: the World's Most Unlikely Construction Material"	Prof. Colin Bain, Durham University, UK

*unless otherwise stated
