

SCHOOL OF CHEMISTRY
Research Seminar Programme

Semester 1 (Michaelmas Term) September to December 2016

Thursdays at 12 noon*

Chemistry LARGE Lecture Theatre*

Main Building

Date	Speaker	Title
29-09-16	Prof. Marie Migaud Queen's University Belfast (UK)	<i>Green Chemistry meets biological chemistry and drug discovery: New entities to probe cell metabolism</i>
6-10-16	Dr Eoghan McGarrigle University College Dublin (Ireland)	<i>The Development of Organocatalysts and Reagents for Glycosylation and Heterocycle Synthesis</i>
13-10-16	Prof Ben Tong Zhang Hong Kong University (China)	<i>To be announced</i>
20-10-16	Dr Eli Zysman-Colman University of St-Andrews (UK)	<i>The development of thermally activated delayed fluorescence materials</i>
27-10-16	Prof. Sebastien Clement Universite de Montpellier (France)	<i>Designing conjugated polyelectrolytes for optoelectronic applications</i>
3-11-16	Prof. Michael Probert University of Newcastle (UK)	<i>Exploring the extremes: Single crystal diffraction studies at far from ambient conditions</i>
10-11-16	Reading week	
17-11-16	2016 RSC Centenary Prize Winner Prof. Ken Suslick University of Illinois at Urbana-Champaign (USA)	<i>Inside a Collapsing Bubble: Sonochemistry and Sonoluminescence</i>
24-11-16	Prof. Peter Griffiths University of Greenwich (UK)	<i>Bubbles, snot and slime</i>
1-12-16	Prof. Thomas Nugent Department of Life Sciences and Chemistry Jacobs University Bremen (Germany)	<i>Beyond Chemoselectivity: Catalytic Site-Selective Aldolization of Diketones and Exploitation for Enantioselective Alzheimer Drug Candidate Synthesis</i>
8-12-16	Dr. Anna Company Universitat de Girona (Spain)	<i>Spectroscopic studies and oxidizing reactivity of high-valent Ni-oxygen species</i>
15-12-16	Prof. Frederic Barriere Institut des Sciences Chimiques de Rennes (France)	<i>Bacteria at Modified Electrodes as Living Catalysts in Microbial Fuel Cells</i>

*unless otherwise stated
